Stay Focused with Audio Designed for Your Brain

At EPOS, we understand that while we hear with our ears, we listen with our brain. This is why EPOS audio solutions built on EPOS BrainAdapt™ are designed to provide the best conditions for your brain.

Improved Focus

Better Concentration

Increased Productivity

By blocking out distracting noise and providing the most natural sound, EPOS audio solutions minimize the amount of energy it takes your brain to process sound – leading to improved communication and better performance throughout the workday.

Unified Communications

Unlocking Seamless Connectivity with Unified Communications

Are you looking for a way to streamline your business communications? Unified Communications (UC) offers the perfect solution. As businesses evolve, the consolidation of communication tools becomes increasingly vital. UC covers this necessity by integrating voice, text, and video-based communication into a cohesive platform.

The EPOS headsets for UC are crafted to seamlessly integrate with major UC platforms. They deliver the best sound quality for both the user and the listener, ensuring your message is always delivered with utmost clarity. Whether stationed in the office, attending meetings, on the go, or working remotely, EPOS stands ready with a diverse range of high-quality, wired and wireless headsets and speakerphones. These products enrich your UC experience and ensure uninterrupted connectivity.

Our partnerships

At EPOS, we pride ourselves on our strategic partnerships with leading global Unified Communications providers and contact center vendors. Through certifications and long-term collaborations, we deliver unprecedented end-to-end solutions that simply work.

Experience the future of seamless connectivity with EPOS and Unified Communications.

IMPACT

When Talk Matters

Whatever your line of business, clear and seamless communication is essential for excellence. And in a world where 40 percent* of professionals spend long durations on the phone, and where noisy and open work environments are the norm, this proves even more important. It's

for this reason that our products are designed and crafted with superior materials that filter out unwanted noise, clarify speech and are fully compatible with all your devices and systems. So you get perfect communication, every single time.

EPOS Audio and Design

Innovation you can hear

We recognize the importance of individuals having premium audio solutions. We know that what you hear, how your voice is captured, and the comfort of wearing your headset, are all crucial factors. That's why we categorize our product development into three distinct areas to ensure a comprehensive understanding of our technical capabilities:

- EPOS Sound™
- EPOS Voice™
- EPOS Design

By meticulously addressing each of these areas, we ensure that our products deliver an unparalleled audio experience including sound quality, microphone performance and product design.

EPOS Sound™

Sound as if you were right there

EPOS Sound™ creates an immersive experience, making it feel like you're speaking face-to-face. It monitors ambient sound and adjusts volume levels to help you concentrate and protect your hearing. You can listen to teammates or announcements without removing your headset and block out background noise for better focus, boosting your performance and energy levels.

EPOS Active Noise Cancellation (ANC)

This noise reduction technology features an "adaptive" capability that continuously monitors your surroundings and automatically adjusts to ambient noise, delivering the optimal level of suppression exactly when and where it's needed.

EPOS ActiveGard™ technology

This technology protects headset users against acoustic injuries from sudden sound bursts while maintaining continuous communication.

Semi-open acoustic technology

A specially designed, semi-open acoustic vent system allows some sound to escape while permitting controlled ambient noise to enter, effectively reducing occlusion.

EPOS Voice™

Exceptional speech clarity

EPOS Voice™ enhances speech clarity by focusing on your voice and eliminating background noise. It ensures natural voice reproduction and adapts to your environment for clear sound, enabling seamless use of digital voice assistants anywhere.

Environmental noise cancellation (ENC)

AI based noise reduction incorporated in the microphones to reduce background noise, filter out disturbing ambient noise and enable crystal clear conversations.

Own voice detector

AI based own voice detector ensuring same clarity of voice independent on boom arm positioning.

SpeakFocus™ Technology

Focuses on your voice to deliver a calm, steady sound picture, which enhances voice intelligibility for listeners.

Super wideband audio technology

Subtle tonal details enhance understanding. Your voice will be crisper and clearer, enabling callers to hear all nuances for complete intelligibility.

WindSafe™ Technology

By balancing and enhancing the user's voice when speaking outside in windy conditions, it ensures the clearest possible sound is sent to your listener.

EPOS AI™

An embedded machine learning system in EPOS audio devices processes audio and makes decisions independently. By leveraging advanced algorithms, this system enables the device to automatically adapt to your speech and analyze your sound environment.

EPOS Design

Crafted to Last, Designed to Excite

Crafted with a passion for design, pioneering technology, and a love for detail, EPOS products are designed for those who demand excellence from their audio devices. We use high-quality materials to craft solutions that are built to last, providing the perfect balance between exceptional audio and maximum wearing comfort.

EPOS IntelligentFit™

An advanced ear fit analysis tool that leverages AI and a comprehensive database of over half a million ear scans. This technology predicts the optimal earbud shape, enabling EPOS to design earbuds that provide the best combination of comfort, sealing, and stability available on the market.

Sustainability

EPOS is committed to contributing to UN's Sustainable Development Goals.

Climate impact. We strive to reduce packaging and waste, support production and sourcing of green energy and strive for ambitious emission reductions particularly in our use of transport.

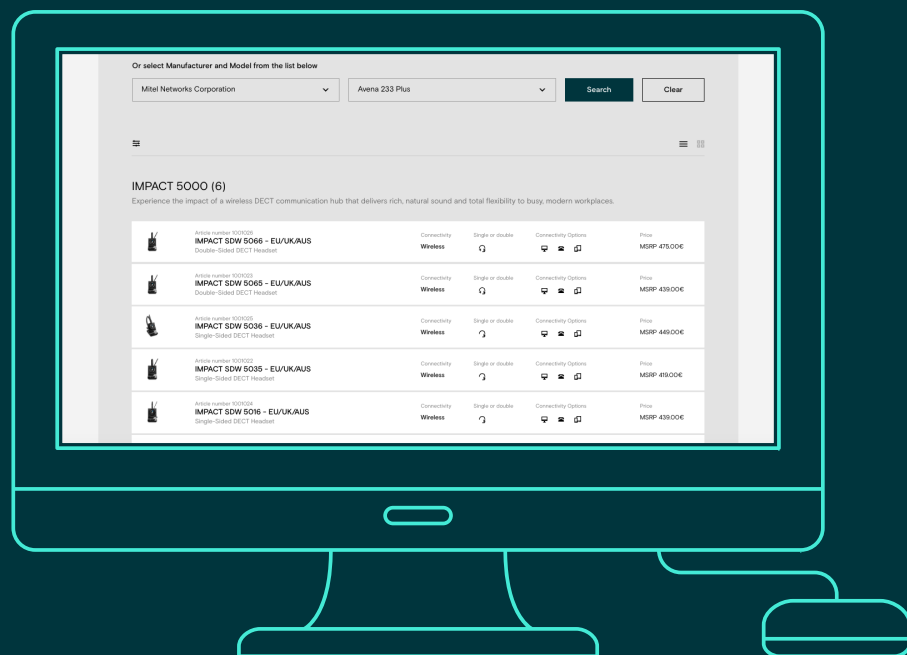

Diversity and inclusion. We honor diversity and foster an unbiased and inclusive culture with equal opportunities. We have a focused approach to diversity, equity, and inclusion

Compatibility Guide

Looking for a business headset for a particular phone, device or platform?

Use our online Compatibility Guide to find the choices available to you and to learn about the different headset features.

Try EPOS Online Compatibility Guide
