

Wall mount installation

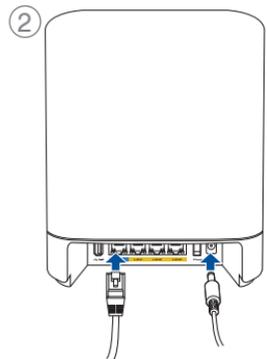

E22018

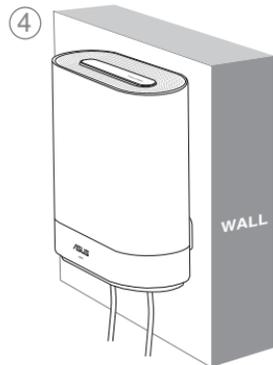

Drill two holes in the desired installation position on the wall and secure the wall mount stand.

Align the mounting slot on the rear side of the device with the wall mount stand and press until you hear a click.

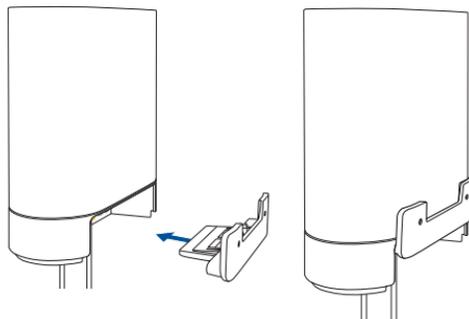

Connect the power cable and the network cable to the device.

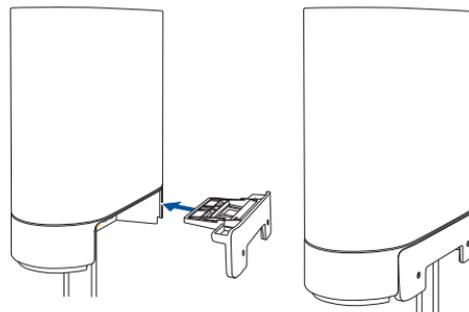

Wall-mount installation is complete.

Features:

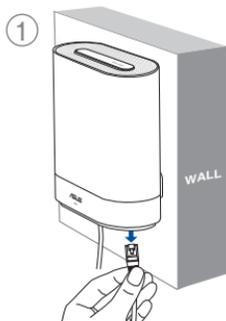

- Built-in wall-mounting slot and a wall-mounting stand make it easy to install the device as demand.

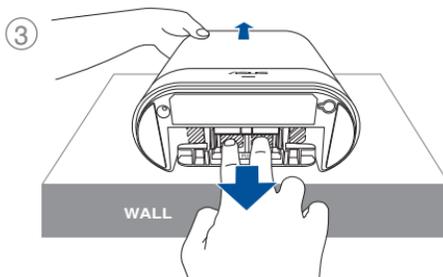

- Install the stand upside down for more space to hide messy cables.

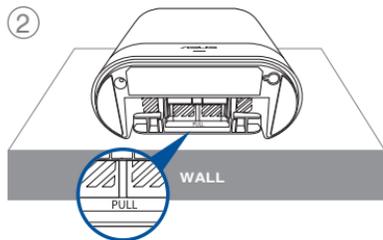

Detaching the device

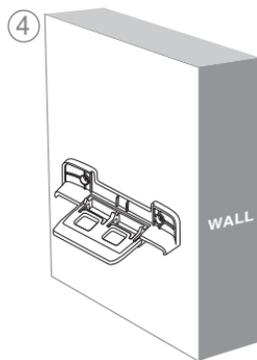

1 Disconnect the power cable and the network cable from the device.

3 Pull downwards with two fingers to unlock the retention tab, and lift the device with the other hand.

2 Locate the bottom of the stand indicating **PULL**.

4 Take the device from the wall-mount stand.
