DS620

DNP's new flagship model in the printer line-up.

Many thousands of DS printers are performing reliably in the field. The DS620 features enhanced TPH* lifetime. We are confident you will enjoy a great product. Here's the proof: DNP Photo Imaging Europe offers 2 years warranty!

Providing flexibility on photo formats, the DS620 offers anything from 5x15 to 15x20cm.** The new rewind function allows you to efficiently offer multiple formats from all media.

The standby mode ensures low power consumption, while the rewind mode makes sure your consumables are used up efficiently.

The DS620 produces crisp colours on Fotonisio Premium Digital photo paper. On the same media you have the choice of glossy or matte according to your requirements.

With a high throughput, the DS620 produces up to 400 prints per hour. The first photo is ready in 10 seconds; afterwards it takes approx. 8.9 seconds per picture. This makes DNP's new flagship model one of the fastest professional photo printers.

*Thermal Print Head.

**DS620 will offer 15x23cm (6x9 inch) starting in Spring 2015. Please check for firmware updates.

consumables

Profitable photofinishing with flexibility, quality and speed!

Specifications

Print method	Dye sublimation Thermal transfer
