SKILLER

SGK4
ILLUMINATED GAMING KEYBOARD

FEATURES

- Gaming keyboard with RGB backlight illumination
- N-key rollover support
- Anti-ghosting keys
- Gaming software
- Individually configurable key functions
- 4 profile and illumination keys
- Gaming mode with disabled windows key

- Function keys with preset multimedia actions
- Arrow keys functions are interchangeable with the WASD section
- Onboard memory for game profiles
- 1,000 Hz polling rate

N-KEY ROLLOVER SUPPORT

The key rollover specifies how many keystrokes can be simultaneously registered by the keyboard. The vast majority of rubber dome keyboards only have 2-key or 6-key rollover. Therefore, the gameplay elements cannot always be all simultaneously pushed to the limits during complex games. However, because optimized gaming fun is of great importance to genuine SKILLERs, the SKILLER SGK4 recognizes any number of simultaneous keystrokes thanks to n-key rollover support.
