Luz LED. No mirar fijamente al haz. **Este producto contiene una fuente luminosa de la clase de eficiencia energética « D »**

**PT** : Se o cabo exterior ou o fio estiverem danificados, os mesmos devem ser substituído exclusivamente pelo fabricante, pelo seu serviço técnico ou uma pessoa devidamente qualificada para o efeito, a fim de se evitar qualquer risco.  
Luz LED. Não olhe directamente para a mesma. **Este produto contém uma fonte de luz da classe de eficiência energética « D »**

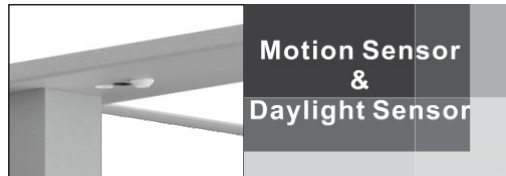

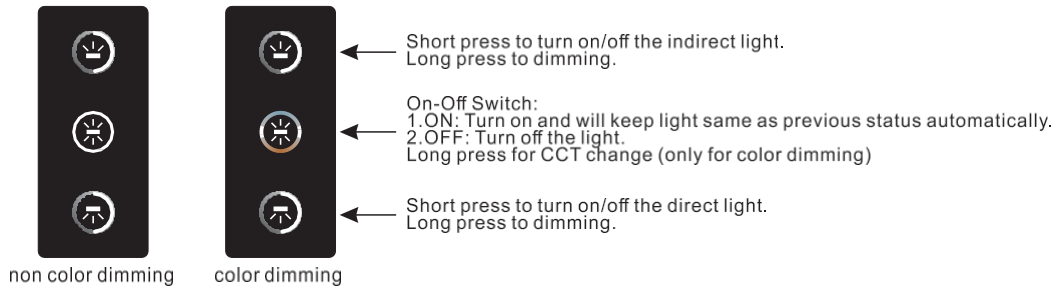

**IT** : Se il cavo esterno o il filo di questa lampada sono danneggiati devono essere sostituiti esclusivamente dal produttore, dal suo reparto di assistenza o da persone con qualifica adeguata, al fine di evitare qualsiasi rischio. Luce a LED.  
**-Non fissare direttamente il fascio luminoso. Questo prodotto contiene una fonte luminosa di classe di efficienza energetica «D»**

**SV** : Om sladden är skadad måste den bytas ut av tillverkaren, dennes serviceavdelning eller en person med liknande kvalifikationer, för att undvika eventuella risker.  
LED-ljus. Titta inte in i ljusstrålen. **Denna produkt innehåller en ljuskälla med energieffektivitetsklass « D »**

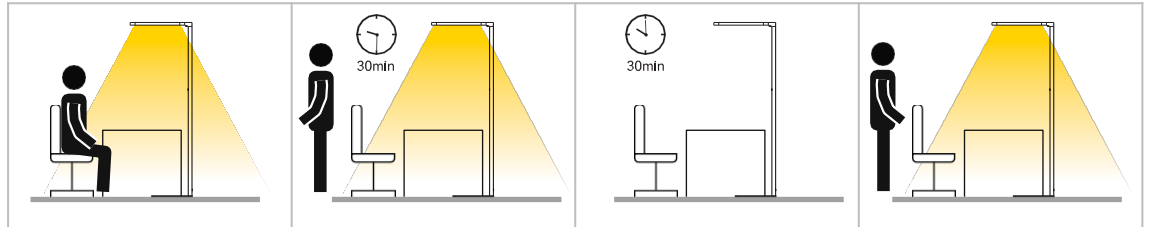

**FI** : Mikäli liitäntäjohto tai kaapelin eriste rikkoutuu on se vaihdettava valmistajalla, tämän huoltopisteessä, tai henkilöillä jolla on vastaava osaaminen.  
•LED-valo: Älä katso suoraan valonsäteeseen.  
**Tämä tuote sisältää valonlähteen, jonka energiatehokkuusluokka on « D »**

**NO** : Om ledningen er skadet, må den kun erstattes av produsent, produsentens serviceavdeling eller av personell med tilsvarende kompetanse for å unngå risiko.  
LED lampe, ikke se rett inn i lyskilden. **Dette produktet inneholder en lyskilde i energieffektivitetsklasse « D »**

**PL** : Jeżeli zewnętrzny przewód elektryczny ulegnie uszkodzeniu, w związku z niebezpieczeństwem porażenia prądem jego wymianę może dokonać jedynie producent, jego przedstawiciel serwisowy lub inna wykwalifikowana osoba.  
Uwaga: oświetlenie LEDowe. Nie patrzeć prosto w światło. **Ten produkt zawiera źródło światła o klasie efektywności energetycznej « D »**

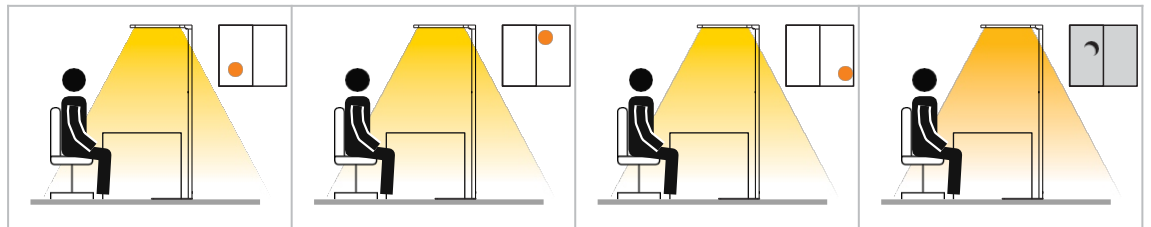

## A.Motion Sensor

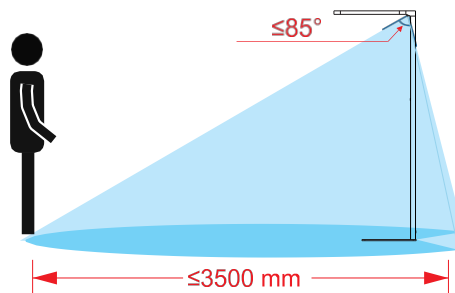

- 1.Turn on the lamp
- 2.The lamp brightness reduces to around 30% when there is no presence in about 30 min
- 3.After another roughly 30min, the lamp switches off automatically when still no presence detected
- 4.The lamp will switches on automatically at once when there is presence detected.

## B.Daylight Sensor

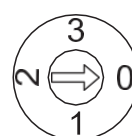

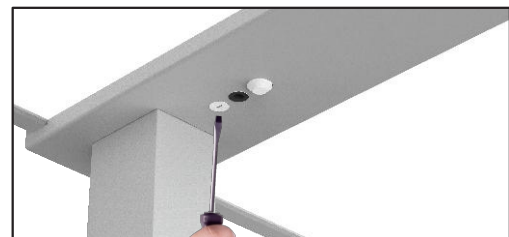

- 1.Turn on the light and dimming to a comfortable brightness, the daylight sensor will memory this lux value which performance on desk as a standard lux.
  - 2.When ambient brightness increase (reduce), light will adjust to reduce (increase) its brightness, and guarantee the lux on desk are same to that standard lux, or at least close to that standard lux, it may have around 10% tolerance.
  - 3.When every time dimming again on light brightness, daylight sensor will memory this new lux value which performance on desk as a new standard lux.
- Attention: The lux value which the light performance on desk will be effected if there is any change on desk within the area of 20° angle under the daylight sensor.

Detectable area

Here to tell you how to play **Motion Sensor & Daylight Sensor**

| Dip<br>switches | Motion<br>sensor | Daylight<br>sensor |
|-----------------|------------------|--------------------|
| 0               | OFF              | OFF                |
| 1               | ON               | OFF                |
| 2               | ON               | ON                 |
| 3               | OFF              | ON                 |

Open the top cover, adjust the dip switch to the module by screwdriver.
