Safety Instructions:

- Observe the maximum load capacity of 50 kg per shelf. Do not exceed the maximum load of 50 kg per shelf.
- Attach carefully and ensure that the brackets are correctly secured. Ensure correct attachment and stability to avoid accidents. Fixing aids should always be installed in accordance with the relevant technical instructions.
- Only use the additional shelves in designated material cupboards without a centre partition. The additional shelves may only be used in material cupboards without a centre partition. Only suitable for material cupboards without a centre partition.
- Be aware of the risk of damage if additional floors are overloaded.
- Keep away from heavy objects to avoid injury.
- Before installation, ensure that the cabinet is stable and secured against tipping.
- The floors are designed for use in indoor situations. Suitable for indoor use, not for outdoor use.
- Do not exert excessive pressure on the floors to avoid deformation.
