Safety Instructions:

- Ensure that the cabinet is stable, on a level surface and correctly levelled to prevent it from tipping over.
- Regularly check the stability and the floor levelling screws of the cabinet to prevent it from tipping over.
- Store heavy objects in the lower section of the cupboard to prevent them from tipping over.
- Avoid overloading or improper use of the sliding doors to prevent damage and injury.
- Keep fingers away from the sliding doors when closing to avoid crushing injuries.
- Ensure that the sliding doors are properly installed and functional to prevent falling, slipping and jamming.
- Keep the cupboard area clear to avoid tripping hazards and to ensure unhindered use.
- Carry out assembly and use in accordance with the instructions to minimise safety risks.
- Keep the cabinet dry and ensure that the stainless steel is moisture resistant to prevent rust or corrosion.
- Watch out for sharp edges or exposed screws to avoid injury.
