

Product Safety Information

Aluminium loading rails

Manufacturer/Responsible Person: ALTEC GmbH, Rudolf-Diesel-Straße 7, 78224 Singen, Deutschland

E-Mail: info@altec.de

Please note the technical data of the products!

Article Numbers: 97860, 97859, 97858, 97857

Safety Instructions:

- Only use the loading rails on stable, level surfaces to minimise the risk of tipping over or slipping.
- Do not exceed the maximum load capacity of 600 kg per pair to avoid safety risks.
- Observe the protective edge to avoid injuries and keep the loading rails away from children.
- When using, always pay attention to the tare weight of between 12 kg and the stability, and have the loading rails monitored by another person to ensure safety.
- Carry out a risk assessment for use in professional areas.
- Always use suitable stop brackets to prevent tipping or slipping.
- Protect the loading rails from extreme temperatures and moisture to extend their service life.
- Always wear suitable footwear to minimise the risk of slipping.
- Keep the surrounding area free of obstacles to avoid tripping hazards.
