Safety Instructions:

- Avoid improper use to prevent injuries caused by mechanical stress.
- Ensure that the load capacity of 2 kg is not exceeded in order to guarantee stability and safety.
- Only use the universal clamp for panel thicknesses of 18 - 74 mm to ensure secure installation.
- Install the universal clamp according to the instructions to ensure stability.
- Avoid use in areas with excessive heat or humidity.
- Do not position near water sources to minimise the risk of electrical hazards.
- Regularly check the installation and stability of the telephone swivel arm.
- Anti-twist guards must be installed and maintained.
