

Product Safety Information

Floor marking tape, self-adhesive foil

Manufacturer/Responsible Person: ITW LLC & Co. KG, Am Eichenbach 14, 73054 Eislingen/Fils, Deutschland

E-Mail: info@itwindustrialsolutions.com

Please note the technical data of the products!

Article Numbers: 74913, 74912, 74911, 74910, 74909, 74908, 74907, 74906, 74905, 74904, 74903, 74902, 74901, 74900

Safety Instructions:

- Beware of slipping hazard: Product could become slippery when wet.
- Intended for indoor use. Outdoor use could impair durability.
- Do not use near fires or extreme heat as the material is flammable.
- Do not use on load-bearing structures or in safety zones that could potentially lead to accidents.
- Do not use directly on open surfaces near food, product not suitable for direct contact with food.
- The manufacturer's instructions must be observed during processing and application.
- Not suitable for use in areas with extreme temperatures or chemical influences, observe the temperature limit of 0°C to 40°C.
- The application temperature should be between 0 °C and 40 °C. Exceeding this temperature may result in deformation of the product.
- When removing the film, ensure that no residue remains to avoid the risk of slipping.
- Check adhesion to different surfaces before application to ensure safe use.
- Avoid contact with chemical substances that could impair the adhesive properties of the film.
- Water can impair the adhesive strength; do not lay out the film for permanent contact with water.
- This film is not designed for permanent contact with water; long-term use in damp environments can impair the adhesive strength.
- The self-adhesive film should be applied to clean and dry surfaces to ensure optimum adhesion.
- When using outdoors, observe the temperature limits: Application temperature from 0° C to 40° C.
- When storing the product, the storage temperature should be between -10° C and 25° C. Do not exceed the recommended storage temperatures.
- Do not use in areas where there is direct contact with water or solvents.
- Only use the product within the recommended temperature ranges (0° C to 40° C)
- Can cause damage to the surface if handled incorrectly.
- Choking hazard: Small parts can come loose or be mistaken for food.
- Not suitable for children under 3 years - possible choking hazard due to small parts.
