Safety Instructions:

- Use the ladder safely in accordance with the instructions: Users should read and follow the instructions carefully before use.
- Avoid overloading the ladder beyond the recommended maximum load capacity: Do not overload the ladder, observe the maximum load capacity.
- Ascent and descent only from the centre step. No more than one person on the ladder at a time.
- Ensure that the ladder is on a stable and non-slip surface: Use the ladder on a stable, level surface.
- Do not use the ladder in strong winds or bad weather: take extra precautions, especially in windy or uneven terrain.
- Regular inspection for damage or wear before each use: Check the stability of the ladder before use.
- Storing the ladder in a dry and protected place: Careful handling and storage of the ladder to prevent damage.
- Ensure non-slip foot plugs to prevent the appliance from tipping over.
- Keep children and unauthorised persons away from an area near the ladder.
- Never lean the ladder against an unsafe or unstable surface.
- Wear suitable personal protective equipment when working at height.
- The use of conductors in the vicinity of electrical cables is dangerous. Keep a safe distance.
- Do not use the ladder as a scaffold or platform.
- Make sure that the rungs are not wet or slippery to minimise the risk of slipping.
- Use only by trained persons who understand the instructions for use.
