Please note the technical data of the products!

Article Number: 95472

Safety Instructions:

- Make sure that the base plate is securely mounted to prevent it from slipping or tipping over.
- The rubber overlay provides a non-slip surface, but ensures that the floor is level and dry to maximise slip resistance.
- Avoid treating the rubber surface with chemical cleaning agents, as this could impair its non-slip function.
- The movable bearing should be checked regularly for wear to ensure the safety of the product.
