Article Numbers: 89130, 89129, 301843, 301842, 301841, 175231, 175230, 175223, 175222

Safety Instructions:

- Ensure that the cable snake is not overloaded or overloaded; the maximum cable load capacity must be observed.
- Ensure that the cable snake is installed in accordance with the instructions to ensure stability and safety.
- Avoid using the cable snake in damp or wet environments or near water sources to minimise electrical risks.
- Keep small children away from the cable snake and its assembly to avoid the risk of suffocation, strangulation or injury.
- Regularly check the integrity of the cable snake and remove damaged parts immediately.
- Ensure that the product is correctly installed before use.
- Consult specialised personnel if you are unsure about the installation.
- Do not use in such a way that children can easily injure themselves.
- Ensure that all electrical connections are properly insulated.
- Always follow the manufacturer's instructions when using electrical appliances.
- Ensure that the electrical components are properly secured during installation to avoid short circuits.
- Make sure that there are no sharp edges to avoid injuries.
- Avoid overfilling the chambers to ensure ventilation and safe use.
- Check the cable connections regularly to detect possible damage or wear.
- The maximum load of 25 cables should not be exceeded in order to prevent overheating.
- Installation should only be carried out by qualified personnel.
- Enclose product information and instructions for safe installation.
- Take safety precautions to prevent the system from overheating.
- Provide disposal instructions for the product to minimise environmental risks.
- Risk of electric shock if electrical components are used incorrectly.
- Choking hazard due to improper handling of small parts.
