Safety Instructions:

- Glowing cigarette butts should not be left in the ashtray for any length of time to avoid burns.
- The ashtray and litter bin are only suitable for outdoor use and should not be used indoors.
- The ashtray must be emptied regularly to prevent overflowing and the risk of fire.
- The product is heavy and should be assembled and used carefully to prevent tipping.
- Children should not use the combi ashtray without supervision to avoid unintentional hazards.
- Make sure that the ashtray is mounted on a stable and firm surface to prevent it from tipping over.
- Avoid using the ashtray near flammable materials and open flames to minimise the risk of fire.
- Only use the ashtray for its intended purpose and in accordance with the manufacturer's instructions.
- The self-closing flap should be checked regularly to ensure that it is working properly.
- Warnings on use must be affixed in accordance with the Product Safety Ordinance.
- Make sure that no heavy objects are placed on the ashtray to avoid injury.
- Ensure that the ashtray is properly installed and secured, especially the base plate, to prevent tipping and injury.
- Regular maintenance and emptying of the ashtray to prevent overfilling.
- The ashtray should not overheat or be exposed to excessive temperatures.
- When disposing of waste, observe local regulations and do not put any flammable materials in the ashtray.
- The safety instructions and installation instructions must be strictly observed.
