Safety Instructions:

- High visibility jacket has moving parts that can cause injuries if handled incorrectly. Small parts such as buttons and zips could come loose and pose a hazard; keep away from small children if there is a risk of suffocation from loose parts.
- Before wearing the jacket, make sure that all fasteners and seams are intact and properly fastened to ensure its protective properties. The jacket should be checked regularly for wear and damage, especially at seams. Discontinue use if the product shows signs of damage.
- Follow the care and cleaning instructions in the user manual to maintain the protective function of the materials.
- Avoid contact with hot surfaces or naked flames, as the material may be flammable. Do not use the high-visibility jacket near naked flames or heat.
- The jacket has been designed for use in various weather conditions, but is not suitable for use in extreme weather conditions. Make sure that you are wearing the right clothing for the conditions.
- Make sure that the jacket is worn in wet or windy conditions to ensure the desired protection. Be particularly careful in wet conditions as the risk of slipping is increased.
- Be aware that the jacket may impair your visibility and bear in mind that visibility may be limited in low light conditions.
- Keep out of the reach of children.
