Safety Instructions:

- For non-flammable, flammable, highly flammable and extremely flammable media, only use in accordance with water hazard class WGK 1-3.
- Take care when storing hazardous substances; they should be stored in suitable containers.
- Do not exceed the maximum load capacity of the gratings (500 kg/m²).
- Ensure splash protection and collection volume to avoid environmental damage.
- Follow detailed safety instructions for handling and protection against unexpected leaks.
- Only open and close the depot in accordance with the operating instructions; observe the profile cylinder lock.
- Carry out regular inspections of the depot and storage conditions.
- Consult the safety data sheets for the stored media before use.
- Ensure that the storage capacity is not exceeded to avoid structural damage.
- Carry out regular inspections of the drip tray for leaks.
- Observe special regulations and guidelines when storing hazardous substances.
- Clean the integrated rain gutter regularly to prevent the accumulation of liquid.
- Before opening the door, check that there are no hazardous substances inside.
- Regularly check the gas struts for proper functioning to ensure safe operation of the roof.
