Safety Instructions:

- Assume food use. No aggressive chemicals should be used that could damage the surfaces of the cabinet.
- Ensure that assembly is carried out in accordance with the instructions in order to avoid injury from falling parts.
- Do not overload the product to ensure stability and safety.
- Regularly check the sealing of access points and air openings to ensure compliance with hygiene requirements in the food industry.
- When using the appliance, ensure that children do not have access to the inside of the cabinet to avoid injury.
