Please note the technical data of the products!

Article Numbers: 91826, 91825, 460771, 460770

Safety Instructions:

- Before use, ask verbally and in writing for information on the areas of application of the canister.
- Restrict the use of the canister for unauthorised purposes.
- Ensure that the canister is not used at temperatures above the recommended values.
- Regularly check the canister for cracks or leaks, especially when storing food.
- Store the canister out of the reach of children and in a childproof place to minimise the risk of suffocation from caps or small parts.
- Ensure that the canister is not stored near open flames, strong heat sources or direct sunlight in order to avoid deformation and material damage.
- Do not use for the transport of hazardous substances.
- Check for damage before use and ensure that the canister is clean and the inner walls are free of residue.
- Do not fill a sealed canister with chemical or non-food-safe substances.
- Only suitable for food and drinking water. The canister may break or leak if used incorrectly.
