Please note the technical data of the products!

Article Numbers: 91818, 91817, 150319, 150318, 150317, 150316, 150315

Safety Instructions:

- Only suitable for liquid raw materials. Not suitable for use with solid materials or flammable liquids above 70°C.
- Maximum operating temperature from -20°C to +70°C. Do not use for contact with hot liquids above 70°C. Do not use the product near open flames or high temperatures.
- Please ensure that the funnel is thoroughly cleaned before the first and each subsequent use to avoid contamination. Empty and clean thoroughly after use.
- The funnel should be well secured to prevent liquids from leaking. Take care on wet surfaces due to the risk of slipping.
- Wear suitable protective equipment when handling chemicals or corrosive substances. Protect hands and eyes from splashes.
- Do not use above the maximum permitted temperature. Protect from direct sunlight to avoid material deformation.
- Take care when using the universal funnel, as there is a risk of overflow or splashing, especially when used with a Ø 208 mm funnel and splash guard overflow rim.
- Suitable for use in the food industry, but ensure that it is thoroughly cleaned after use.
- Do not leave children unattended as there is a choking hazard due to small parts. Keep the product out of their reach.
- Observe the material resistance in areas with strong chemical vapours or when handling liquids containing solvents. Ensure product integrity.
- Handle with care to avoid breakage or damage.
