Please note the technical data of the products!

Article Numbers: 157005, 157004, 157003, 157002

Safety Instructions:

- Before use, ensure that all drawers are properly engaged and correctly secured to prevent them from slipping.
- Avoid overloading the drawers to prevent tipping and injuries.
- The drawers should always be closed when not in use to prevent falls and small children should be supervised when handling the product.
- The use of the central lock is recommended to prevent unauthorised access. The drawers are fitted with a central lock to increase security.
- Regular maintenance of the ball bearing guides to ensure smooth operation. Ensure that the drawer runner is properly installed.
- To avoid injuries, make sure that no body parts are in the way when drawers are opened or closed.
- Do not use the product if damage or defects are visible.
- The drawers are not suitable for storing highly flammable materials. Smaller parts could pose a choking hazard if they are removed from the drawer.
- Use only for the intended purpose.
- Avoid using the product in wet environments.
- The manufacturer's instructions must be followed exactly when fitting the drawer base.
