### Safety Instructions:

- Observe the maximum applied load of 40 kg. Do not exceed this, as the product may break.
- Use suitable protective equipment during handling and installation to avoid injury.
- Ensure that the product is correctly installed and secured. Follow the manufacturer's instructions and install on a stable, level surface.
- Not suitable for use by or within the reach of children. Not suitable for children under 36 months due to choking hazard from small parts.
- The product is made of sectional steel and should be protected against corrosion.
- Before installation, ensure that the separating element is stable and securely fastened.
- Suitable for use in professional storage racks.
