Safety Instructions:

- Before placing the product on the market, check it for possible health or safety risks.
- Report any hazards or safety problems to the supervisory authorities.
- Be aware of choking hazard due to small parts and fire hazard due to improper use.
- Instructions for use and safety information must be included.
- The fleece coating must not come into contact with sharp objects in order to avoid damage.
- Ensure that the fleece coating is properly installed to ensure optimum performance and safety.
- Before installation, follow all the manufacturer's recommendations for handling and installation.
- Wear suitable personal protective equipment such as gloves and safety goggles.
- Follow safe disposal practices to avoid environmental damage.
- Ensure storage in a place away from fire and direct sunlight and do not release any harmful chemicals.
- Only use for the intended use with corresponding SAFE TANK individual containers.
- Not suitable for direct contact with food.
- Protect from frost and store in a dry place.
- Enclose and observe clear instructions and safety information.
- Carry out a risk analysis of potential hazards.
- Label the product correctly in accordance with the applicable regulations.
- Regularly check the condition of the product for possible damage or signs of wear.
- The product is not intended for children and should be kept out of their reach.
- Avoid contact with chemicals or other harmful substances during use.
- Avoid direct skin contact with the coating to prevent allergic reactions.
