Safety Instructions:

- The use of this cable spiral is only intended for vertical cable routing under suitable conditions and should not be used with excessive heat or in humid environments.
- Ensure that the cable spiral is securely and stably attached to the table to prevent it from falling, tipping over, slipping and the associated risk of injury.
- Take care not to overload the cable spiral and not to exceed the daily load to avoid breakage or damage.
- Children should not be near the product without supervision as small parts may pose a choking hazard and to prevent misuse or injury.
- Avoid contact with sharp objects and excessive heat to prevent fire hazards and damage to the plastic material.
- Take care during assembly: Sharp edges on the product or packaging can cause injuries.
