Article Numbers: 53598, 53597, 53596

Safety Instructions:

- Avoid sitting for long periods to prevent back and neck pain. The recommended maximum sitting time is 8 hours.
- Make sure that the seat height is set correctly to ensure optimum leg posture and avoid back problems.
- Regularly check the functions of the permanent contact mechanism and the fixed and moving parts for wear or damage to prevent accidents.
- This product can be loaded up to 110 kg. Do not exceed the maximum weight of 110 kg to ensure stability and safety.
- The chair is not suitable for children and should be used in a safe environment.
- Ensure that all parts are assembled correctly to avoid injury and consult the assembly instructions if you are unsure about how to handle them or get expert help if necessary.
- The load-dependent braked safety castors are only suitable for carpeted floors. Use only on carpeted floors with the safety castors provided in accordance with DIN EN 1335.
- Choking hazard due to small parts that can be caused by improper handling of the office chair.
- Risk of back problems if the backrest and seat height are not adjusted correctly.
- Risk of slipping when used on smooth surfaces without suitable castors.
