E-Mail: kontakt@cemo-group.com

Please note the technical data of the products!

Article Numbers: 150478, 150477, 150476

Safety Instructions:

- When using the castor frame on uneven or slippery terrain, there is a risk of slipping and falling and special care should be taken.
- Ensure that the weight of the standard containers does not exceed the load capacity of the roller frame. Avoid overloading beyond the permissible load capacity.
- For safe transport, use the swivel castors with swivel and swivel lock. Users should ensure that the wheels are properly locked when the frame is parked.
- Before use, ensure that all parts of the castor frame are fully and correctly assembled and that both the correct assembly and the function of the castors are checked.
- Do not overload the product or use it under extreme conditions, as this may jeopardise safety. Only use it in the intended area of application and observe the warnings regarding safe movement and positioning of the containers.
- Carry out regular maintenance and check the swivel castors for wear.
- Ensure that the authorised transport and storage conditions are observed.
