### Safety Instructions:

- Ensure that the furniture is stable and securely positioned to prevent it from tipping over. Make sure that the table is placed on a stable surface to prevent it from tipping over.
- The table top is heavy; make sure that it is securely mounted on the table frame to prevent it from tipping over. Ensure that all parts are correctly assembled before using the table. Make sure that there are no loose parts that could cause injury.
- Keep small parts and accessories away from children to avoid the risk of suffocation. Choking hazard due to improper use of small parts.
- Ensure that furniture is not located in unsuitable areas to ensure safe use by children. Keep out of reach of children to avoid injury.
- Height adjustments should be carried out in accordance with the instructions to avoid injury. The stepless height adjustment should only be operated by adults to prevent injury.
- Cables should be laid neatly to avoid tripping hazards. The use of vertical cable ducts should ensure that there is no risk of tripping due to cables lying around.
- The table tops should not come into contact with sharp or hot objects to avoid damage. Protect the table surface from excessive heat to prevent discolouration or damage.
- Take care to avoid climbing up onto the table, as this can lead to a fall.
- Risk of electric shock due to improper handling of electrical components.
- Risk of injury from sharp edges or corners of the table top.
- Assembly should be carried out in accordance with the enclosed instructions to ensure that the product is assembled correctly and safely.
- The gas pressure spring must be checked regularly to ensure that it is working properly in order to prevent sudden movements of the table top.
