Safety Instructions:

- Customers should be informed about installation instructions and safety information to prevent improper use.
- Ensure that all electrical components are properly insulated and electrification is carried out by qualified personnel in accordance with safety standards to avoid the risk of electric shock.
- Avoid using sharp edges or protect them to minimise the risk of injury; edges and corners of the desk can pose a risk of injury.
- Keep small parts and accessories away from children to avoid the risk of choking.
- Ensure that all screws and connections are firmly tightened and the floor levelling screws are correctly adjusted to ensure stability and a stable stand.
- Avoid using damp cleaning agents on melamine resin-coated surfaces.
- Do not exceed the maximum load limit and only use the table for its intended purpose to avoid damage or tipping over; observe the maximum load capacity.
- Be careful when adjusting the height to avoid injury.
- Warning: Use only for the intended purpose.
- Ensure that the materials do not contain any harmful ingredients.
- Keep all cables properly stowed away to avoid tripping hazards.
- The maximum adjustable working height of 820 mm should not be exceeded in order to ensure the stability of the table.
