Safety Instructions:

- Keep away from small parts to avoid choking hazard.
- Observe the recommended installation and operating instructions to avoid injury.
- Place the cabinet on a stable and level surface to prevent it from tipping over. Ensure stability, especially when using several shelves or cabinets in combination.
- Avoid overloading shelves and compartments to ensure the stability of the cupboard and prevent accidents.
- Keep children away from the products while they are unassembled and monitor their use by small children, as drawers and doors can pose a risk of injury.
- When used in offices or commercial areas, ensure that the shelves are installed stably to prevent them from tipping over.
