

Product Safety Information

Cross bracing for System R 3000, optionally for bay width 995 mm or 1282 mm

Please note the technical data of the products!

Article Numbers: 30555, 30554

Safety Instructions:

- Cross bracing must be used for longitudinal bracing in at least every 3rd bay.
- Ensure that all the manufacturer's safety and installation instructions are observed.
- Ensure that the product safety has been checked before use.
- Check the stability and load-bearing capacity of the product before installation and use.
- Ensure that all parts are properly assembled to avoid accidents.
- There is a risk of tipping over or collapsing if not installed correctly.
- Use only in accordance with the intended specifications and instructions for use.
