Safety Instructions:

- Make sure that the cabinet is standing on a level and stable surface to prevent it from tipping over.
- Heavy objects should be evenly distributed to prevent instability and tipping.
- Avoid overloading the drawers and observe the maximum load capacity.
- Keep small children away or use the cabinet under supervision to avoid injury from drawers or heavy doors.
- Use the lock mechanism carefully to avoid overloading and use the central locking system for safety.
- Avoid harsh cleaning agents and direct heat or moisture to prevent damage to the coating and materials.
- Ensure that all parts of the cabinet are stable and without visible damage before using it.
- Regularly check the functionality and stability of the cabinet parts.
- The manufacturer's instructions for installation and use should be followed carefully to ensure safe and correct use.
- The cabinet should be used indoors and should not have any sharp edges or protruding parts.
- The drawers should be properly closed to prevent injuries.
- Take suitable safety precautions if the product is accessible to children.
- The product should not be installed near water sources.
