Safety Instructions:

- Ensure that the installation meets the stability requirements and that the cabinet is placed on a stable and level surface to avoid the risk of tipping.
- Avoid injury from sharp edges or protruding parts; ensure that no tools or short parts are used when adjusting the shelves to avoid injury.
- Provide clear instructions for the safe use and installation of the product.
- Ensure that all moving parts are properly secured to avoid the risk of crushing.
- The product should not be stored where it is accessible to children in order to prevent the risk of suffocation from small parts and to avoid injury from tipping over; the cabinet is not designed for use by children; careful handling is required.
- Pay attention to the load capacity of the individual shelves (maximum load is 50 kg per shelf) to prevent them from falling out and bending.
- Do not open the closed cabinet doors with excessive force to ensure the stability of the hinges.
- Always use the key provided to securely lock the cabinet to prevent unauthorised access; the use of the correct key must be observed for security and access.
- Avoid using cabinets in direct contact with water or in damp rooms.
- Observe the regulations for disposing of the product in order to minimise environmental and health risks.
- Do not clean the cabinet with sharp objects or chemicals to avoid damaging the surface.
