Article Numbers: 54009, 54008, 54007

Safety Instructions:

- Avoid sharp edges to prevent injuries.
- Ensure that the table is stable and regularly check the stability and safety devices to prevent it from tipping over.
- Use the height adjustment of the table with care and make sure that the table height can be set between 720 mm and 820 mm to ensure comfortable use.
- Ensure that the desktop connection panel is used correctly: It may only be connected and used by qualified personnel and suitable sockets and devices should be used to avoid the risk of electric shock.
- Ensure that all electrical connections and devices are safely installed in the table to avoid the risk of electric shock.
- Keep the table away from water and other liquids to prevent damage to the surface and electrical components.
- There is a risk of suffocation if small parts of the connection panel are used improperly or detached; prevent children from playing with these parts.
- Please ensure that the table is not overloaded, especially if it is used by a maximum of 12 people.
