Safety Instructions:

- The product may only be placed on a level and non-slippery surface to prevent it from tipping over.
- Assembly and installation should be carried out in accordance with the enclosed instructions to ensure safety and stability.
- Take care not to place heavy objects over the recommended maximum weight and distribute heavy objects evenly to minimise the risk of tipping or structural damage.
- The furniture must be assembled in a sufficiently stable manner to prevent it from toppling over, especially in households with children.
- The product should be placed out of the reach of children and secured to the wall to prevent injury.
- Keep away from heat sources and direct sunlight to prevent damage to the material.
- Keep the cabinet away from sources of water to prevent damage to the material.
- Improper use, especially contact with sharp objects, can result in the risk of injury; take care when handling the furniture.
- Suitable instructions must be included for safe assembly and all small parts should be kept out of the reach of children.
- Proper disposal of the furniture and its parts is required in accordance with local regulations in order to avoid environmental damage.
- The product is only suitable for indoor use and should only be used for its intended purpose.
- Check the stability of the furniture regularly and tighten the screws if necessary to ensure continued safety.
- Observe the maximum load capacity to avoid overloading and to prevent breakage or instability.
- The product should be made of non-toxic materials in order to minimise health risks.
- Do not overload the product; observe the maximum load capacity.
- Read the entire installation instructions carefully before use to prevent accidents during use.
- The product must be sufficiently stable to prevent it from tipping over.
