Safety Instructions:

- Avoid sharp edges and corners during assembly and only use the cabinet in accordance with the enclosed instructions to avoid injury.
- The product must be properly installed and placed on a stable and level surface to prevent mechanical hazards and tipping over.
- Keep the product away from moisture, heat sources and direct water to prevent damage.
- Make sure that all parts are in perfect condition and are checked regularly, including the hinges and locks, to ensure that they function properly.
- Ensure that all drawers and compartments are not filled beyond their maximum load limits (e.g. max. 60kg per compartment) and that heavy loads are correctly distributed to prevent damage and tipping over.
- Do not install the product in an area where it could be in the way or fall down and avoid children playing with it without supervision.
- Ensure that there are no sharp edges or unsecured parts that could cause injuries, crushing or cutting hazards.
- Recommend the use of lockable cabinets for the secure storage of sensitive documents and ensure that they are childproof.
- Specific instructions for safe use, handling and height adjustment of the shelves should be included in a clear and comprehensible manner.
- Avoid small parts that may be in the cupboard or drawers posing a choking hazard for children and keep the cupboard out of reach of children.
