Safety Instructions:

- Pay attention to the load capacity of up to 1.2 tonnes and avoid overloading. The weight should be evenly distributed and the maximum weight should not be exceeded when using heavy tools.
- The workbench must be set up on a stable and level surface.
- Care must be taken when adjusting the height to avoid the risk of crushing. Ensure that the height is secured after adjustment. This should only be carried out by adults and the bench must be sufficiently stable.
- Avoid using the workbench in environments with direct moisture. Prolonged contact with water or aggressive cleaning agents can damage the surface.
- Keep children away from the workbench to avoid injury. Make sure that all drawers are fully closed to prevent them from tipping over.
- Ensure that the workbench is used and handled correctly to avoid injury. Make sure that no parts are loose or can fall off.
- Ensure that the worktop is clean and free of obstacles before starting work.
- Follow the instructions for installation and use to avoid accidents.
