Safety Instructions:

- The high strength of the polyester tape can lead to crushing, so store and use safely.
- Take the maximum load capacity into account: Monitor the breaking load to ensure safe use, especially in commercial applications.
- Before use, ensure that the tape is undamaged and suitable for the intended purpose.
- Do not stretch or overload to avoid breakage.
- Do not use the tape over sharp edges to avoid damage.
- Store the tape in a dry and cool place to prevent material ageing or deterioration.
- Avoid contact of the tape with sharp objects and direct sunlight.
- Keep the strap out of the reach of children to avoid injury. Not suitable for children under 3 years of age.
- Only use the polyester tape for the intended applications. The strong adhesive strength requires caution.
- Suitable gloves must be worn during processing to prevent skin irritation or injury.
- Not for use by children without supervision. Secure the belt so that it cannot injure anyone.
- The product should not be used near sources of heat or naked flames.
