Article Numbers: 190789, 190788, 190787, 190786, 190780, 190779, 190778, 190777, 190776

Safety Instructions:

- Choking hazard for children under 3 years due to small parts; not suitable and should be kept away from them.
- Ensure that the product is placed stably and securely on a suitable base to prevent it from tipping over and causing injury.
- Assembly should only be carried out by adults in accordance with the instructions in order to avoid possible injury.
- Assembly is tool-free, no screws required; ensure that all parts are correctly installed.
- Avoid overloading the metal shelves; load capacity per shelf is 75 kg.
- Secure closure of the cabinet with integrated lock; keep the key safe to prevent unauthorised access.
- Check regularly for damage and discontinue use if there are signs of wear.
- Check the product regularly for damage; do not drop heavy objects on roller shutters to avoid injury.
- Observe changes in the condition of the cabinet in order to recognise possible safety risks at an early stage.
- Place the product away from heat sources and open flames and protect it from moisture and direct sunlight.
- Only fit additional shelves in accordance with the manufacturer's instructions; do not overload.
- Cover the handle opening with a lock to prevent unauthorised access.
- Rounded edges offer protection against injury.
- Dispose of waste in accordance with local regulations.
- Detailed instructions for installation and use are enclosed.
- When transporting the product, ensure safe storage conditions to prevent damage.
