Safety Instructions:

- Use the safety lock to protect children from danger. The child safety lock must always be active.
- Only use for authorised liquids. There is a risk of explosion if used incorrectly. Only use for the transport of authorised hazardous substances.
- Suitable protective measures, including respiratory protection, must be taken when handling fuels.
- Do not use near naked flames or sparks. Do not bring into contact with flammable materials.
- Store safely and keep away from excessive heat. Store and transport safely to prevent leakage.
- Do not store in the presence of food.
- Ensure that the outlet pipe is inserted correctly to prevent leaks.
- Check that the seals are undamaged before use.
