Safety Instructions:

- When using the pallet truck, suitable protective measures are taken to prevent injuries.
- Users should only allow trained personnel to operate the pallet truck.
- Ensure that heavy loads are handled correctly to prevent the pallet truck from tipping over.
- Check the product regularly for damage, in particular steering lock and brakes.
- Do not exceed the load capacity of 3.5 tonnes.
- Only use the pallet truck on level surfaces to ensure safety.
- Ensure that all users have read and understood the operating instructions.
