Safety Instructions:

- Do not load above the maximum load capacity of 2.5 tonnes.
- Risk of injury due to improper use and improper lifting.
- Do not allow untrained personnel to operate the appliance.
- Always ensure that the forklift surface is clean and dry to avoid the risk of slipping.
- Take care when using in confined spaces due to the turning radius of 1425 mm.
- Only use the product for the intended applications.
- Check the condition of the pallet truck before use, especially the hydraulics and castors.
- Ensure that no persons are standing under the raised load area.
- Wear suitable safety shoes and protective clothing when using the pallet truck.
- Avoid being in the vicinity of the pallet truck during operation.
- The pallet truck should only be handled by trained and authorised personnel.
