E-Mail: post@hanselifter.de

Please note the technical data of the products!

Article Numbers: 305083, 305082

Safety Instructions:

- Before using the scissor lift trolley, ensure that all safety devices and the handbrake are working properly.
- Prevention of overloading, maximum load capacity: 1,000 kg.
- Only use the pallet truck on firm, stable surfaces to prevent it from tipping over; the surface must not be slippery.
- Observe the permissible lifting height and strokes; do not use beyond the technical specifications.
- Ensure that there are no persons or obstacles in the danger zone of the pallet truck during operation and lowering.
- Read and follow the safety and operating instructions carefully before using the pallet truck.
- Wear appropriate protective equipment when handling the pallet truck, especially when loading and unloading loads.
- Operating the pallet truck requires careful training in order to avoid accidents.
- Regularly check the condition of the hydraulic pump and the rubber tyres.
- Avoid improper use of the hand lever to prevent uncontrolled lowering.
