

Product Safety Information

Manual double scissor lift tables SPS

Manufacturer/Responsible Person: Hanselifter, Straubinger Straße 20, 28219 Bremen, Deutschland

E-Mail: post@hanselifter.de

Please note the technical data of the products!

Article Numbers: 305133, 305132

Safety Instructions:

- Risk of suffocation due to improper handling of heavy loads.
- Risk violation due to inadequate safety level during operation.
- Risk of injury when lifting and lowering due to improper use of the hand pump.
- Insufficient stability of the lift table at maximum load may cause it to tip over.
- Please ensure that all safety devices, such as the parking brakes, are used correctly.
- Use only on firm, level surfaces.
- Do not exceed the maximum load capacity (150 kg / 350 kg, depending on model).
- When lifting heavy loads, always ensure a stable base.
- Ensure that the table is on a firm surface when loading and unloading.
- To avoid accidents, do not bring hands or body parts into the scissor area.
- Never stand or work under a raised table.
- When using hydraulic components, ensure that they are tight and functional.
