Safety Instructions:

- Observe the load capacity of 300 kg and 500 kg. Do not exceed the maximum load capacity.
- Safe handling when lifting and lowering the table to prevent crushing.
- Apply the parking brakes on the swivel castors during loading and unloading, check the inserts of the parking brakes on the swivel castors and the surrounding area for obstacles.
- Correct use of the removable roller conveyor to prevent falls.
- Avoid lifting above the recommended maximum height of 1585 mm.
- Ensure that the lift table is used on a stable, level surface.
- Read and follow the safety instructions before use.
- Use the foot pump in accordance with the manufacturer's instructions.
- Ensure accessibility for unauthorised persons, especially children.
- Regularly check the condition and functionality of the castors and brakes.
