Safety Instructions:

- Ensure that the load capacity of 400 kg is not exceeded.
- Only use the appliance on a stable, level surface.
- Ensure that the forks are properly secured before lifting.
- Lift the load evenly to prevent the high-lift pallet truck from tipping over.
- Users should wear safety gloves and safety shoes to prevent slipping.
- Avoid using the pallet truck if you are under the influence of alcohol or drugs.
- Check the brakes and castors regularly to ensure that they are working properly.
- Make sure that the platform is not overloaded.
- Do not lift the appliance above the maximum lifting height of 1.5 m.
- Train personnel in the safe handling of high-lift pallet trucks and only allow trained personnel to operate the device.
- Take particular care when lifting heavy loads to avoid injury.
- Do not lift or lower the forks with people in the vicinity.
- Ensure correct handling of the foot pedal to prevent sudden lowering.
- Ensure regular maintenance and inspection of the brakes to prevent unexpected rolling.
- Avoid crushing between the pallet truck and other objects.
- Check cables and electrical components regularly for damage.
- Only use the foot pedal and rotary knob as intended.
- Observe the operating instructions during use.
- The product is designed for professional use and should not be used by non-professionals.
