Article Numbers: 162574, 162573, 162572, 162571, 162570, 162569, 162568, 162567, 162566, 162565, 162564, 162563, 162562, 162561

Safety Instructions:

- Not suitable for applications in toxic or hazardous environments.
- Exposure to direct sunlight can impair durability and UV resistance. Protect from direct sunlight to avoid discolouration.
- The labels should not be used above the specified temperature limits (-20° to +100°C).
- Regularly check the labels for possible damage to ensure safe use.
- Do not use products in a flammable or gaseous environment or in the vicinity of naked flames.
- Not suitable for applications in the food sector. Direct contact with food has not been tested.
- Avoid application on heavily textured or uneven surfaces.
- Store in a cool, dry place to ensure quality. Do not store in direct sunlight to avoid UV damage.
- Use only for the intended purpose. Provide safety information in understandable language.
- Outdoor applications require attention to weather conditions and are generally suitable.
- Avoid contact with aggressive chemicals that can impair the properties of the film.
- Ensure that the labels are used on suitable surfaces to ensure adhesion.
- Not suitable for temperatures above +100°C. Protect from extreme temperatures.
- Suitable for laser and thermal transfer printers. Observe the safety precautions recommended by the manufacturer.
- Not reusable; residues may occur if stored incorrectly.
- Do not apply directly to the skin; avoid contact with skin and eyes.
- Keep away from children, as improper handling can cause injuries.
