Safety Instructions:

- Observe fire protection to minimise the risk of fire and notify the fire brigade if there is a risk of fire.
- Check filing cabinets regularly for structural integrity, damage and fire resistance to ensure proper functioning.
- Product may cause mechanical damage if used improperly.
- Observe the door opening angle and take care not to get your fingers trapped.
- Store keys securely to prevent unauthorised access.
- Ensure that the filing cabinet is correctly assembled and properly locked before use.
- Double-walled construction ensures safety; however, do not overload and do not install near sources of fire.
- Before opening, ensure that the filing cabinet is stable to prevent it from tipping over; ensure sufficient stability and stability.
- Read the operating instructions before use and follow the instructions for safe use and maintenance.
- Not suitable for children under 12 years of age.
- All maintenance work may only be carried out by specialised personnel.
