Safety Instructions:

- Maximum recommended sitting time: 8 hours per day.
- The maximum load capacity of the office chair is 110 kg. Overloading can lead to breakage.
- Be careful when using the safety lift to avoid injury.
- Maintaining an ergonomic sitting position to prevent back pain.
- Observe regular care and cleaning of the cover to avoid durability, allergies and discomfort.
- Before use, check that all parts are properly assembled and pay particular attention to safety when adjusting the height.
- Make sure that the office chair is placed on a stable, level surface to prevent it from tipping over.
- Keep the chair and mechanisms away from water and extreme temperatures to prevent damage.
- Use the safety lift to adjust the seat height safely and according to the instructions.
- Only persons who are able to operate the chair safely should use it; not suitable for children under 12 years of age.
- Avoid sudden movements, excessive tilting or unstable sitting positions to prevent injuries.
- The product should have visible warnings and safety information.
- The manufacturer must ensure that inactive components of the product do not pose any risks.
- Specific user groups such as children or the elderly must be taken into account for safety.
- Children must not use the chair without supervision.
- The height of the chair should only be adjusted while seated.
- Keep the upholstery dry to prevent mould growth.
