Article Numbers: 142759, 142758, 142757, 142755

Safety Instructions:

- The maximum load capacity is 120 kg. Overloading can lead to damage to the chair. Note: Suitable for people up to 120 kg.
- Do not use the chair on uneven surfaces as this can affect its stability. Pay particular attention to carpeted floors, as double castors are not always ideal for all materials.
- Make sure that the seat and backrest remain securely locked in place to prevent slipping.
- Ensure that the height adjustment and other mechanisms are only operated by adults. Children should not use them without supervision. Incorrect operation can lead to injuries and even suffocation.
- Regularly check the chair for correct seating and damage to prevent injuries. Improper assembly of the mechanism increases the safety risk.
- Clean the chair and the fabric-covered cover according to the instructions to ensure durability of the material and safety.
- Regular exercise is recommended, as excessive sitting can be detrimental to health. Sitting for more than 8 hours can lead to fatigue.
- Maintain good ergonomics to minimise health risks when sitting for long periods. If you have back problems, we recommend using the lumbar support.
