Safety Instructions:

- Only use the scales in the intended environment and position them on a stable and level surface.
- The scale is only suitable for use within the permissible temperature range of -10 °C to +40 °C.
- Do not exceed the maximum load capacity to avoid damage or malfunctions.
- Before use, ensure that the scales are correctly levelled to avoid inaccuracies.
- Contact the manufacturer in the event of faults or uncertainties.
- Do not overstretch the scale: Do not overstretch the cable length between the scale and the analyser.
- Avoid contact with water or other liquids; observe IP65 protection.
- Risk of suffocation and injury due to improper use, especially with small parts and heavy loads.
- Risk of electric shock due to improper handling of electrical components; exercise caution when making electrical connections.
- Calibrate the scales regularly to ensure the accuracy of the measurements.
- Install the scale and electrical connections correctly to avoid the risk of electric shock.
- Not suitable for children under 3 years due to small parts; keep away from children.
- Protect the scales from extreme temperatures, direct sunlight and strong vibrations.
- Distribute weighted material evenly on the weighing plate to avoid imbalance.
- Avoid placing sharp or heavy objects on the weighing plate.
