Safety Instructions:

- Observe and do not exceed the maximum load capacity of 110 kg to ensure stability.
- Ensure that the office chair is safe and stable for the intended use.
- Include instructions for safe use and assembly of the chair and assemble the chair correctly to avoid injury.
- Provide information on the height adjustability and correct adjustment of the chair to the user's height.
- Use of the office chair by adults only to avoid injury.
- Regularly check the parts for wear or damage for safety reasons.
- Use a stable surface when using the chair; be especially careful when using it on carpeted floors.
- The armrests do not provide full support; careless use can lead to tension.
- Observe the recommended sitting time of up to 8 hours to avoid damage to health.
- Frequent cleaning of the cover to maintain hygienic conditions.
